

TECHNICAL FEATURES

DESCRIPTION	Output	Feature	Machine
ROASTING MACHINE "H.Y.C."100 PLUS automatically operated	2500 kgs/h	Time of cycle 1'30" (70 kgs) 6' (240 Kgs) According the roasting degree	"fast roasting" the time of cycle,very quick,prevents the exit of the essential oil,which usually occurs with a long distillation
Burner Power	1.000.000 Kcal/h	FLUID BED	The heat transmission is got by "forced convection" in order to get a high homogenizing of the product which "floats" in the hot air current
Batch/h	12- 30	Time of cycle suggested 5'30"	The cylinder speed is mechanically changeable in order to get the desired times of "contact"

Burner duly equipped (Pressure switch, aut ignition transformer, flame control) etc
